

UNIFORM CARE

DO'S

1. PRESOAK: If your uniform is heavily soiled or has grass/mud stains and you are not able to launder it immediately, please soak the uniform in a container of water and pre-soaking agents until you are able to launder it. Mud and grass stains will set in these uniforms.

2. WASHING: Do not wash the white uniform with other colors. These uniforms tend to pick up colors very easily. Please wash all pieces of the uniform in cool water with a mild detergent. If the uniform shows any discoloration after the first wash cycle, please wash the uniform again before it dries.

3. DRYING: Please hang the uniforms to dry whenever possible. The dryer will discolor the uniform pieces and may result in shrinkage.*

DON'TS

1. *If use of a dryer is necessary, please do not use high heat! The heat will soften the numbers causing them to stick to each other. Remove the uniform from the dryer immediately!
2. Do not use bleach. The chance of color separation and the weakening of some materials is increased with the use of bleach.
3. Do not wash pieces with contrast colors together.
4. Do not dry clean any uniform pieces.
